**munit**  
shift serv.

**1,2,3,4,5,6 ...** the programmes are running at full speed and maximum value. While HAL9000 is slaving away, munit drops by. HAL is happy! Breakpoint!

Who is munit? munit is two: Dietrich Foth and Sven Lütgen. The data streams meet. munit has already set its programmes on shitkatapult (ger), mute (uk), lounge essenzen 03 (ger), civik records (can). Now it passes 5 programmes to HAL9000.

**one: shift serv.** Dance to the future, tricky beats, call it space funk.

**two: shift serv. HAL9000 mix.** Repacked 4 to the floor burner. get in.

**three: mikados.** A distorted ghost train journey through Biene Maja's (who is this bee?) empire of darkness.

**four: coridor.** Landed in the middle of cleared up landscapes made from steel, glass and concrete.

**five: jupelt.** Multilingual algorithm for 2step noddors.

**six: cessorpa.** On a meadow without garlic in its place an old robotic beat with a colourful dense superstructure.

**Yes. That's the new HAL9000/22: shift serv by munit.**

**Get it from Kompakt. You don't need to know more but to listen. Listen listen, move on ...**
